Contents:

- HLA Fusion (analysis software) basic setting, installation
- Introduction for Veritas product
- Analysis of Micro SSP
- Analysis of LABScreen
- Special lecture; The importance of HLA in transplantation.
(Dr. Kimura, Tokyo Medical and Dental University)

Details:

Veritas Corp is a leading company of HLA field. We brought HLA serological technology from One Lambda over 30 years ago and have supplied a variety of HLA reagents in Japan. Analysis Part is very important for diagnosis, so we focus to hold this seminar using HLA Fusion analysis software. Recently, many customers inquired HLA Fusion operation and analysis, so we decided to hold the above seminar.

On that day, 15 institutes and 25 persons attended this seminar. We prepared PC one by one institute and dual-screen to make them understand more clearly because it was easy to understand.

In the Special lecture, Dr. Kimura explained from the basic knowledge of HLA to the latest clinical information, was very popular with the participants.
