

JACLaS(Japanese Association of Clinical Laboratory Systems) EXPO 2016

Veritas exhibited at JACLaS Expo held in Yokohama, September 22-24, 2016. This Expo is the largest show which displays the newest diagnostic instruments and reagents in Japan. Our purpose is to promote raw materials such as Ag, Ab, serum.... etc to IVD manufactures. This was a great opportunity for us to introduce raw material suppliers to Japanese IVD companies. Over 8,000 people attended this EXPO. During the expo, we met many existing and prospect customers, and had meaningful meetings. VERITAS works as a distributor to many of the diagnostics kit manufacturers and pharmaceutical research laboratories in Japan to import bulk products based on their requirements. We introduced following suppliers this year and we also had successful short seminars in our booth.
